MANAGEMENT'S DISCUSSION & ANALYSIS ("MD&A") OF FINANCIAL CONDITION & THE RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED MARCH 31, 2007

May 28, 2007

Introduction

Management's discussion and analysis ("MD&A") focuses on significant factors that affected Compliance Energy Corporation performance and such factors that may affect its future performance. In order to better understand the MD&A, it should be read in conjunction with the unaudited consolidated financial statements for the three months ended March 31, 2007 and the Company's 2006 audited consolidated financial statements and the related notes contained therein. The Company reports its financial statements in accordance with Canadian generally accepted accounting principles ("Canadian GAAP"). The Company's significant accounting policies are set out in Note 2 of the audited consolidated financial statements for the year ended December 31, 2006. Additional information on the Company is available and can be found at www.sedar.com or www.complianceenergy.com.

Overall Performance

The Company recorded income of \$1,242,735 or \$0.03 per share for the three months ended March 31, 2007, as compared to a loss of \$126,159 or \$0.00 per share for the three months ended March 31, 2006. In order to better understand Compliance Energy's financial results for the three months ended in 2007, it is important to gain an understanding of the stage of development of the Company's main assets: (1) the wood waste power plant project located near the Company's Basin Coal Mine that has been awarded a 30 year take or pay Electricity Purchase Agreement from BC Hydro. The Company has continued to work with government to modify the fuel mixture to 100 per cent wood waste. Output from the project utilizing this fuel mixture could be eligible to be classified as BC Clean Electricity under BC Government guidelines; (2) the Vancouver Island Coal Deposits which completed an exploration program in 2006 and the Company is now awaiting a formal report on that program; and (3) the Basin Coal Mine of which Compliance holds a 100% interest.

Development expenditures on the Princeton Power Project have all been deferred during the quarter and will continue to be deferred until a resolution is reached on the project's status with BC Hydro and the BC Government. Similarly, exploration expenditures on the Vancouver Island coal assets have also been deferred as the Company evaluates the results of its' 2006 exploration program. The Company has decided to place the Basin Coal Mine on care and maintenance and does not plan to operate the mine during 2007. However, some minor coal sales from inventory are expected during the year.

During the quarter the Company had interest income of \$79,321 as compared to \$11,259 for the three months ended March 31, 2006. The increase in interest income is a result of the Company earning interest on the funds placed in escrow to support the BC Hydro performance bond. In addition, the Company sold 1.25 million shares of its investment in Copper Mountain Mining Corporation for \$1 per share that resulted in a gain on sale of investments of \$1,269,233. Professional fees were \$19,052 for the three months ended March 31, 2007, as compared to \$25,339 for the period ended March 31, 2006. General and Administrative expenses were \$50,941 for the three months ended March 31, 2007, as compared to \$69,417 for the three months ended March 31, 2006. The decrease in General & Administrative charges is a result of reduced expenses due to sharing of office space and expenses with another Company. General and Administrative were mainly made up of; \$35,990 of office wages, \$589 of bank and interest charges, \$2,421 office expenses, \$5,132 printing and stationary, \$4,949 miscellaneous, \$1,860 for subscriptions and publications. General and administrative charges for the

three months ended March 31, 2006 were made up of; \$28,558 office wages, \$5,875 office expenses, \$12,337 office rent, \$12,500 of donations, \$2,278 printing and stationary, \$4,819 miscellaneous, and \$3,050 of subscriptions and publications.

The Company incurred \$8,298 in transfer agent fees and \$23,573 in shareholder communications fees during the three months ended March 31, 2007 as compared to \$12,814 and \$18,432 respectively for the same period last year.

Selected Annual Information

Selected consolidated financial information of the Company for each of the last three completed financial years is detailed in the MD&A accompanying the Company's 2006 audited consolidated financial statements.

Liquidity and Capital Resources

As at March 31, 2007, the Company had working capital of \$281,127 (comprised of \$0.4 million of cash, \$0.12 million of receivables, prepaid expenses and marketable securities, offset by \$0.3 million of accounts payable) as compared with a working capital deficiency of \$331,919 (comprised of \$0.8 million of cash, \$0.2 million of receivables and prepaid expenses, and \$3.4 million of investments and marketable securities, offset by \$1.3 million of accounts payable and \$3.5 million in a short term loan) at December 31, 2006.

The increase in working capital between December 31, 2006 and March 31, 2007, was a result of the sale of 1.25 million shares of Copper Mountain Mining Corporation ("CMMC") for \$1 per share and retiring the \$3.5 million term loan with Quest Capital Corp of Vancouver, British Columbia. CMMC is currently a private Company, however, CMMC has signed an agency agreement with Raymond James Ltd. whereby Raymond James is acting as the lead agent in the initial public offering of CMMC's shares. Once these shares are publicly traded, it is the intention of the Company to continue to sell the remaining share position in order to minimize further dilution to shareholders and provide some capital to the Company. Funds for the redemption of the Quest Capital loan came from a return of capital from BC Hydro for the Company's performance security. Once an agreement is achieved with BC Hydro and the government on the future of the Princeton Power Project, then this performance security may or may not be required to be replaced.

Company currently has 0.5 million warrants outstanding that, if exercised, would generate approximately \$0.4 million dollars of new equity money for the Company. These warrants have an exercise price of \$0.75 per share and an expiry date of August 10, 2008. In early 2007 the agency agreement to raise up to \$10 million in equity with Jennings Capital Inc. and Dundee Securities Corp. was officially terminated, as the Company has decided to wait for the 43-101 report on Vancouver Island and resolution with the BC Government and BC Hydro before reentering the equity markets. With the current exploration program on the Raven Metallurgical Coal Deposit on Vancouver Island, and the cash requirements for the Company on its Princeton Power Project, the Company will require additional sources of money. It is anticipated that these additional sources of money would take the form of debt and equity, financed specific to each project.

The following table is selected quarterly financial for the Company's eight most recently completed quarters. The information has been derived from the Company's financial statements and should be read in conjunction with the consolidated quarterly financial statements and the audited financial statements for the year ended December 31, 2006.

Summary of Quarterly Results

Quarter	Revenue	(Net Loss) Income	Basic (Loss) Income per Share	Fully Diluted (Loss) Income per Share
March 31, 2007	-	\$1,242,735	\$0.03	\$0.03
December 31, 2006	-	\$(8,825,255)	\$(0.22)	\$(0.22)
September 30, 2006	-	\$(137,568)	\$(0.00)	\$(0.00)
June 30, 2006	-	\$(203,803)	\$(0.00)	\$(0.00)
March 31, 2006	-	\$(126,159)	\$(0.00)	\$(0.00)
December 31, 2005	-	\$(499,432)	\$(0.01)	\$(0.01)
September 30, 2005	-	\$(95,410)	\$(0.00)	\$(0.00)
June 30, 2005	-	\$(127,195)	\$(0.00)	\$(0.00)

The Company's quarterly results are sensitive to the activity of the Company at that particular period of time. During the first quarter of 2007 the Company realized a gain of \$1.25 million from the sale of 1.25 million shares of Copper Mountain Mining Corporation ("CMMC"). After the sale, the Company's remaining ownership in CMMC is 2.75 million shares or approximately 20 per cent. The Company took a one time charge against income of \$9.18 million in the last quarter of 2006 as a result of writing down the asset value of the Basin Coal Mine to its net realizable value. During the quarter ended December 31, 2005 the Company expensed a stock based compensation expense of \$370,000. Other than the items listed above, the remaining quarters were fairly consistent with each other.

Project Reviews

Raven Metallurgical Coal Project

The Company is currently completing a 43-101 technical report on the property which is expected to be completed by June 2007. The 43-101 technical report will be incorporating data contained in historical reports supplemented by recent drilling and seismic surveys carried out by Compliance Energy under the supervision of Owen R. Cullingham, P. Geo., who is the Qualified Person for reporting purposes on this exploration program. There are a total of 140 holes drilled on the property including the 12 drill holes completed as part of the Company's 2006 exploration program, of which 67 have been drilled since 1974 and supported by geophysical logs. There is also 34.6 kilometres of seismic surveys conducted on this property. When the 43-101 technical report is completed a new coal resource estimate will be reported. A total of \$171,101 has been deferred on this project during the quarter ending March 31, 2007.

Princeton Power Project

As a result of the province changing its direction on the acceptability of coal as a fuel for electricity production in BC, the Company has continued to have discussion with the BC Government and BC Hydro regarding the switching the project to be entirely fueled with wood which could make it eligible to be classified as BC Clean Electricity under BC Government guidelines. The Project would utilize locally available wood waste and Mountain Pine Beetle killed wood as it becomes available. Conversion to wood will enable the Project to meet Provincial objectives regarding greenhouse gas emissions. The Company will continue to defer all costs associated with this project until discussions between BC Hydro, the BC Government, and the Company have concluded. A total of \$238,092 was deferred in the quarter.

Basin Coal Mine

As a result of the government's change in its new BC Energy Plan that now effectively excludes coal as a source of fuel for electricity production in BC for the foreseeable future, and due to rising transportation and mining costs driven by a lack of economies of scale, the Company has placed the mine on care and maintenance and does not plan to operate the Basin Coal Mine in 2007. A total of \$236,535 has been deferred in the quarter. These deferred costs are primarily made up of security and general administration costs.

Risks and Uncertainties

The Company's success depends on a number of factors, some of which are beyond the control of the Company. Typical risk factors include coal price fluctuations and operating uncertainties encountered in the mining business. Competition for the limited Pacific Northwest thermal coal market may make it difficult to penetrate the market. Future government, legal or regulatory changes could affect any aspect of the Company's business, including, among other things, environmental permitting and taxation costs and the ability of the Company to develop an independent power project. These risks and uncertainties are managed in part, by experienced managers, advisors and consultants, maintaining adequate liquidity, and by cost control initiatives.

Related Party Transactions

During the period, all transactions with related parties have occurred in the normal course of the Company's operations and have been measured at their fair value as determined by management. The Company paid one of its officers management and administration fees aggregating \$14,052 during the period ended March 31, 2007.

Disclosure Controls

Disclosure controls and procedures are designed to provide reasonable assurance that material information is gathered and reported to senior management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate, to permit timely discussions regarding public disclosures. Management, including the Chief Executive Officer and the Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2007. Based on this evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Company's disclosure controls and procedures, as defined in Multilateral Instrument 52-109 - *Certification of Disclosure in Issuers' Annual and Interim Filings*, are effective to ensure that information required to be disclosed in reports that we file or submit under Canadian securities legislation are recorded, processed and reported within the time period specified in those rules.

Supplementary disclosures

During the three months ended March 31, 2007, the Company:

- Deferred \$149,075 in amortization expenses
- Paid interest and closing costs of \$44,546 to pay out the Quest Capital loan.
- Paid \$8,832 in interest costs related to equipment lease obligations

During the three months ended March 31, 2006, the Company:

- Deferred \$139,378 in amortization expenses
- Paid \$10,329 in interest costs related to equipment lease obligations

The accompanying notes are an integral part of this financial statement

COMPLIANCE ENERGY CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2007 (UNAUDITED)

1. BASIS OF PRESENTATION

These interim period consolidated financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles (“GAAP”) with respect to the preparation of interim financial information. Accordingly, they do not include all of the information and disclosures required by Canadian GAAP in the preparation of our annual consolidated financial statements. Certain information and footnote disclosure normally included in consolidated financial statements prepared in accordance with GAAP have been condensed or omitted. The accounting policies used in preparation of the accompanying unaudited interim consolidated financial statements are the same as those described in our annual consolidated financial statements and the notes thereto for the two years ended December 31, 2006.

These interim period statements have not been reviewed by the Company’s auditors and should be read together with the audited consolidated financial statements and the accompanying notes included in the Company’s latest annual report.

2. CONTINUANCE OF OPERATIONS

These interim consolidated financial statements have been prepared on a going concern basis, which assumes the ongoing capacity of the Company to realize on its assets and discharge of liabilities in the normal course of business. The Company’s status as a going concern is dependent on its ability to generate future profitable operations and to receive continued financial support from its lenders and shareholders. Management is of the opinion that sufficient working capital will be obtained from operations and external financing to meet the Company’s liabilities and commitments as they become due. Should the going concern assumption not be appropriate, the carrying values and classifications of assets and liabilities would change and those changes could be material. It is not possible to predict the outcome of those matters at this time.

3. PROPERTY, PLANT AND EQUIPMENT

COMPLIANCE ENERGY CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2007 (UNAUDITED)

4. RESOURCE PROPERTY

a) Basin Coal Mine

The Basin Coal Mine consists of 9 coal licenses covering 8,295 acres, and the mining rights were acquired pursuant to a Mining Agreement dated August 30, 2002. Under this agreement, the Company acquired working rights to the Property and a Right of First Offer in respect to any future disposition of the mineral tenures and related royalty comprising the Property. The property is subject to a royalty of \$1.50 per tonne on all washed coal sold. During the quarter, the BC Government introduced a revised BC Energy Plan that effectively eliminated the use of coal as a fuel in electricity production in British Columbia. As a result the Company has written down the value of the assets at the Basin Coal Mine as of December 31, 2006 by \$9.2 Million (\$3.2 million as an impairment on the value of fixed assets and \$6.0 million as a write-down of deferred costs) and has no current plans to operate the mine in 2007.

b) Bear Metallurgical Coal Deposit

The Bear Metallurgical Coal Deposit consists of 6 coal licenses totaling 4,325 acres. During 2005, the Company exercised its option to acquire coal leases that cover 100% of the Bear Metallurgical Coal Deposit on Vancouver Island. Under the terms of the agreement, the Company paid a total of \$215,000 and granted a royalty of 2.5% of the coal sales, FOB mine site.

c) Raven Metallurgical Coal Deposit

During 2005, the Company entered into an agreement to acquire coal rights that cover approximately 82,000 acres on Vancouver Island, including 100% of the Raven Metallurgical Coal Deposit on Vancouver Island. Under the terms of the agreement, the Company has made a \$250,000 option payment and also made an additional payment of \$150,000 on March 20, 2007; \$2,800,000 is due on or before November 30, 2007; \$2,000,000 in four equal payments over the next four years based on development milestones; and \$4,000,000 by way of a \$0.50 per tonne royalty once production is achieved. The property is subject to no other royalties. In addition, the Company paid a total of \$175,000 to an independent third party for the acquisition of ground contiguous to the Raven property.

d) Anderson Lake Coal Deposit

In 2005, the Company entered into an agreement to acquire 100% of the coal rights that cover approximately 1,938 acres on Vancouver Island. Under the terms of the agreement, the Company paid \$50,000 during the year. The property is not subject to a royalty.

e) Wolf Mountain Mine

During 2004, the Company entered into an agreement to acquire 100% of the common shares of a private company that holds the coal licenses, permits and physical assets of the Wolf Mountain Mine located on Vancouver Island. Under the terms of the agreement, the Company has made an initial \$50,000 option payment and must make an additional payment of \$200,000 on or before December 24, 2009.

COMPLIANCE ENERGY CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2007 (UNAUDITED)

4. RESOURCE PROPERTY *(continued)*

f) CEC Power Project

The Company has an option to lease or purchase 90 hectares of the former Similco mine where the Company is proposing to build a 56MW power plant on a portion of the leased land ("Core Area") from Copper Mountain Mining Corporation ("CMMC"). Under the term of the agreement the Company has the option to purchase or lease the Core Area for \$1 for a period of 5 years. Costs incurred to date on the power plant project have been deferred.

g) The details of the carrying amount of the Company's resource property costs are as follows:

	Cumulative to	
	March 31, 2007	December 31, 2006
Basin Coal Mine		
Mining	\$ 3,762,151	\$ 5,968,640

COMPLIANCE ENERGY CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2007 (UNAUDITED)

5. SHORT TERM LOAN

During 2006, the Company closed a \$3.5 million term loan with Quest Capital Corp of Vancouver, British Columbia. Under the terms of the loan, which has been fully drawn down and is due May 30, 2007, bearing a monthly interest rate of 1%, the Company has issued 646,153 common shares of the Company as "Bonus Shares" as permitted under TSX Venture Exchange rules. The Bonus Shares were subject to a four-month hold period until December 24, 2006. Proceeds from the term loan were used to provide performance security to BC Hydro under the 30 year Electricity Purchase Agreement for the Company's 56 megawatt Princeton Power Project awarded on July 27, 2006. On January 31, 2007, the Company repaid the loan to Quest Capital Corporation as a result of BC Hydro returning the Company's performance security deposit.

6. CAPITAL STOCK

- (a) Authorized
 1,000,000,000 Common shares without par value
 20,000,000 Preferred shares without par value

- (b) Issued

	Common Shares	Amount	Contributed Surplus
Issued at December 31, 2006	47,446,783	\$ 17,476,569	\$ 936,340
